Health Physics Pergamon Press 1977. Vol. 32 (June), pp. 583–587. Printed in Northern Ireland

VOLUME 32 CONTENTS

NUMBER 1 JANUARY

J. J. Donn and R. L. Wolke: The statistical interpretation of counting data from measurements of low-level radioactivity . . . 1
E. V. Benton, D. D. Peterson, J. V. Bailey and T. Parnell: High-LET particle exposure of Skylab astronauts . . . 15
J. C. Guary and A. Fraizier: Influence of trophic level and calcification on the uptake of plutonium observed, *in situ*, in marine organisms . . . 21

Notes

D. M. Taylor: The uptake, retention and distribution of plutonium-239 in rat gonads . . . 29
T. L. Johnson, R. L. Robinson and R. B. Luersen: Fading of LiF–Teflon dosimeters used in identification badges . . . 31
J. L. West and M. C. Bell: A probable radiation-induced epidermal carcinoma in a sheep . . . 32
S. P. Garg: Ultrasonic measurements of chest wall thickness . . . 34
A. Mogro-Campero and R. L. Fleischer: Upper limits of α-radioactivity per particle of cigarette smoke . . . 39
K. L. Miller and R. C. Christensen: A gammacell safety program . . . 40
S. R. Bernard: Dosimetric data and metabolic model for lead . . . 44

Abstracts from the Annual Congress of the South African Association of Physicists in Medicine and Biology . . . 47
News . . . 51
Notices . . . 53
Health Physics Society Prospectus . . . 59
Health Physics Society Affiliate Members . . . 60

NUMBER 2 FEBRUARY

F. M. Whitaker, S. J. Addison and W. R. Hendee: Diagnostic X-ray survey procedures for fluoroscopic installations—part II: automatic brightness controlled units . . . 61
W. J. McDowell and J. F. Weiss: Liquid scintillation alpha counting and spectrometry and its application to bone and tissue samples . . . 73
D. E. Barber and H. R. Giorgio: Gamma-ray activity in bituminous, subbituminous and lignite coals . . . 83
G. M. Kanapilly: Alveolar microenvironment and its relationship to the retention and transport into blood of aerosols deposited in the alveoli . . . 89
J. C. Ritchie and J. R. McHenry: The distribution of Cs-137 in some watersheds in the eastern United States . . . 101

Notes

L. A. Ilyin, A. T. Ivannikov, A. G. Bazhin, T. P. Konstantinova and G. A. Altukhova: Intake of Po-210 into the body through the damaged skin and efficiency of some methods in preventing its absorption . . . 107
E. G. Tombropoulos, J. G. Hadley, J. M. Thomas and D. K. Craig: Biochemical effects of inhaled ^{239}Pu on lung lipids . . . 111
S. P. Garg and D. Newton: Reduction of the low energy background of a phoswich detector . . . 113
W. K. Chu, D. E. Raeside and G. D. Adams: A computerized radiation safety system . . . 116

Letter to the Editor

J. H. THORNGATE: Comments on the note: "Liquid scintillation alpha particle assay with energy and pulse shape discrimination," by P. Cross and G. W. McBeth 119

NUMBER 3 MARCH

F. E. H. CRAWLEY and E. A. GODDARD: Internal dose from carbon-14 labelled compounds. The metabolism of carbon-24 labelled potassium cyanide in the rat 135
S. A. BOOK, R. J. GARNER, J. K. SOLDAT and L. K. BUSTAD: Thyroidal burdens of ^{129}I from various dietary sources 143
S. A. BOOK: ^{131}I uptake and retention in fetal guinea pigs 149
V. VOLF, A. SEIDEL and K. TAKADA: Comparative effectiveness of Ca-DTPA, desferrioxamine B and their combination in removing transuranium elements from rats 155
P. PUUMALAINEN and A. UIMARIHUHTA: Measurement of bone mineral content using gamma-ray attenuation by pair production 159
B. R. FREED: The tissue distribution of ^{47}Sc generated by decay of ^{47}Ca *in vivo* 165
C. H. THOMPSON, J. F. VANDERGRIFT, S. A. SLAYDEN and G. V. DALRYMPLE: Control of radioactive materials on the medical science campus 179
S. S. WALLER and J. D. DODD: Liquid scintillation counting of calcium-45 in plant and soil material 185

Notes

R. B. GAMMAGE and J. S. CHEKA: Further characteristics important in the operation of ceramic BeO TLD 189
A. E. DESROSIERS: Alpha particle dose to respiratory airway epithelium 192
H. SINGH and J. S. MARSHALL: A preliminary assessment of $^{239,240}Pu$ concentrations in a stream near Argonne National Laboratory 195

Letter to the Editor

A. JANSSENS: The hazards of "particle fluence to current conversion" 199

Book Review 201
News 203
Notices 207
Health Physics Society Prospectus 213
Health Physics Society Affiliate Members 214

NUMBER 4 APRIL

D. W. HAYES and K. W. MACMURDO: Carbon-14 production by the nuclear industry 215
W. BRINCK, K. GROSS, G. GELS and J. PARTRIDGE: Special external radiation field study at the Vermont Yankee Nuclear Power Station 221
G. G. EADIE and R. F. KAUFMANN: Radiological evaluation of the effects of uranium mining and milling operations on selected ground water supplies in the Grants Mineral Belt, New Mexico . . 231
S. M. MORSY, E. WERNER, W. STAHLHOFEN and W. POHLIT: A detector of adjustable response for the study of lung clearance 243
R. L. FLEISCHER and O. G. RAABE: Fragmentation of respirable PuO_2 particles in water by alpha decay—a mode of "dissolution" 253
P. J. DARLEY and B. J. MACFARLANE: Scanning electron microscope autoradiography. A technique for the location and study of microscopic β-active particles 259

A. Aarkrog: Environmental behaviour of plutonium accidentally released at Thule, Greenland . 271
G. F. Boothe: The need for radiation controls in the phosphate and related industries 285
A. Jacobson, B. M. Wilson, T. E. Banks and R. M. Scott: ^{192}Ir over-exposure in industrial radiography 291

Notes

J. J. Alberts and M. A. Wahlgren: Concentration of ^{239,240}Pu and ^{241}Am in drinking water and organic fertilizer 295
R. M. Holmgren, W. W. Wagner, R. D. Lloyd and R. C. Pendleton: Relative filter efficiencies for sampling radon daughters in air 297
J. E. Turner, H. A. Wright, R. N. Hamm and B. L. Bishop: Estimated *W*-values for negative pions in tissue-equivalent gas, CO_2 and N_2 300
L. W. Berkley, K. W. Logan and E. Siegel: Dosimetry of zinc radionuclides 303
J. A. Martin, Jr.: Doses while travelling under well established plumes 305
L. M. Rubin, K. L. Miller and W. W. Schadt: A solution to the radioiodine volatilization problem 307
T. J. Powell, P. E. Barry and I. A. Dupzyk: Rapid evaluation of personnel tritium exposure . 310
R. Hiebert, H. Ide and H. Boyd: Low-background plutonium assaying using a modified commercial liquid scintillation detector and sample changer 311
R. E. Wildung, T. R. Garland and D. A. Cataldo: Accumulation of technetium by plants . 314
V. Balasubrahmanyam and M. P. Measures: Internal background build-up measurements in CaF_2: Mn thermoluminescent dosimeters 317
A. Bauman, N. Franic, M. Baumštark and V. Popović: ^{90}Sr in the human bone 318
S. A. Book: Iodine-129: limits to radiologic dose 321
R. B. Holtzman: Comments on "Estimate of natural internal radiation dose to man" 324
F. H. Hashmi, K. A. Shoaib, S. J. H. Bukhari, M. Ali and A. Husain: Stabilized ZrO_2 as a thermoluminescent dosimeter for high gamma doses 325

NUMBER 5 MAY

A. R. Smith, L. D. Stephens and R. H. Thomas: Dosimetry for radiobiological experiments that use energetic heavy ions 343
H. Ing and W. G. Cross: Calculated spectra for the dosimetry of D_2O-moderated neutrons . . . 351
B. L. Cohen: Hazards from plutonium toxicity 359
J. N. Willis and N. Y. Jones: The use of uniform labeling with zinc-65 to measure stable zinc turnover in the mosquito fish, *Gambusia affinis*—I. Retention 381
M. D. Allen, W. T. Kaune and D. K. Craig: A method for vaporizing mixed oxide fast reactor fuels for animal inhalation studies 389
G. E. Chabot, B. Glass and C. Delizza: Reactor primary coolant flow rate determination from observation of the ratio of gamma to neutron radiation levels near the primary line 397
S. Benassai, F. Dobici, A. Susanna, P. L. Indovina, L. Pugliani, P. Salvadori and E. Prozzo: Some results on radiation exposure of the Italian population due to medical diagnostic examination in 1974 403
T. T. Fendley, M. N. Manlove and I. L. Brisbin, Jr.: The accumulation and elimination of radiocesium by naturally contaminated wood ducks 415
J. E. Till: A uniform approach for on-site training and qualification of health physics technicians 423
K. Becker: The world's current and future numbers of people employed as radiation workers and as health physicists 429

Notes

A. M. ROBERTS, D. J. COULSTON and T. H. BATES: Confirmation of *in vivo* uranium-in-chest survey by analysis of autopsy specimens . . . 435

F. O. HOFFMAN: A reassessment of the deposition velocity in the prediction of the environmental transport of radioiodine from air to milk . . . 437

C. E. HOTTE and R. D. ICE: Use of a revised MIRD equation for dosimetric calculations in physical systems . . . 442

D. R. SINGH: Cumulative dose calculations for clinical and diagnostic radionuclides . . . 443

W. J. MCDOWELL, F. G. SEELEY and M. T. RYAN: Penetration of HEPA-filters by alpha recoil aerosols . . . 445

H. MÉTIVIER, R. MASSE, D. NOLIBÉ and J. LAFUMA: Effect of time on the determination of the clearance rates of insoluble plutonium 239 oxide . . . 447

A. KING: Detailed uranium gamma abundances . . . 450

H. MÉTIVIER, R. MASSE, D. NOLIBÉ, J. C. NÉNOT and J. LAFUMA: Effect of ascorbate ions in DTPA treatment after contamination by mixed plutonium dioxide–sodium burning products . 450

R. E. ZELAC, J. W. BERNSEE and D. HAN: Effectiveness in a university health center setting of a commercial compactor for dry solid radioactive waste . . . 452

Letter to the Editor

R. T. BRUNSKILL: Albedo-type neutron dosemeter . . . 455

Book Review . . . 457

News . . . 459

Notices . . . 461

Health Physics Society Prospectus . . . 469

Health Physics Society Affiliate Members . . . 470

NUMBER 6 JUNE

J. C. VILLFORTH: Dedication . . . 471

L. D. EYMAN and T. R. TRABALKA: Plutonium-237: Comparative uptake in chelated and non-chelated form by channel catfish (*Ictalurus punctatus*) . . . 475

J. E. BALLOU, G. E. DAGLE, K. E. MCDONALD and R. L. BUSCHBOM: Influence of inhaled Ca-DTPA on the long-term effects of inhaled Pu nitrate . . . 479

E. GEMENETZIS and V. VOLF: DTPA treatment schedules for decorporation of ^{239}Pu from simulated wounds . . . 489

D. E. GONZALES: A general phantom procedure for calibrating inhaled ^{212}Pb body burdens . . . 493

R. F. MOYER: Analysis of medical usage factors pertinent to radiation protection for a 4-MeV rotational linear accelerator . . . 505

R. S. KAHAN and Y. FEIGE: The wide margin of implicit built-in safety factors in current radiation protection standards . . . 509

H. T. MILLER: Radiation exposures associated with surface mining for uranium . . . 523

H. MATSUZURU, N. MORIYAMA, Y. WADACHI and A. ITO: Leaching behaviour of cesium-137 in cement-waste composites . . . 529

D. F. REED, W. M. SACKETT and R. F. SPALDING: Uranium and radium in livestock feed supplements . . . 535

J. H. THORNGATE: Measurements of the additivity of stopping cross-sections for 50–150 keV protons in nine hydrocarbon gases . . . 541

Notes

B. J. TYMONS and J. W. N. TNYN: Personnel neutron dosimetry by means of cellulose nitrate film combined with LiF as both radiator and TLD . . . 547

N. MORIYAMA, S. DOJIRI and H. MATSUZURU: Leaching of ^{137}Cs from the ion-exchange resin incorporated in polyethylene or cement composite . . . 549

E. POHL and J. POHL-RÜLING: Dose calculations due to the inhalation of ^{222}Rn, ^{220}Rn and their daughters . . . 552

J. H. DUNLAP, P. W. HARVEY and R. L. SCHWING: Comparison of the effectiveness of contemporary ophthalmic lenses against beta radiation 555
W. H. HENRY and G. YELLE: Irradiation timer for shutter of ^{60}cobalt head 559
D. M. MONTGOMERY and J. E. GIBSON: Status of iodine in formaldehyde-preserved milk—revisited 562
T.-Y. WU and P.-S. WENG: Determination of radium-226 in bone of the native Taiwan buffalo and in environmental samples of North Taiwan power reactor site 565
M. S. S. MURTHY: Recommendations of the "Committee 17" on environmental mutagenesis: implications to radiation safety 568

Letter to the Editor

T. RAHOLA and M. TILLANDER: Comment on the paper "Standard field methods for determining ^{137}Cs and ^{131}I *in vivo*" by H. E. Palmer *et al.* 571
